

# ICE FOR EVERYONE

Production and distribution  
of ice and ice products

## ABOUT US

Our company specializes in the production and distribution of ice in all of its forms. Thanks to our technology, the final product is of a certain shape size, and transparency unachievable at home or in amateur conditions.

We produce a lot of different ice products, such as ice cubes, crushed ice, premium ice, ice cups, ice bars, ice statues, and ice blocks (with frozen products).

We offer our hygienically packed products to private parties, retail, and wholesale, business chains, restaurants, hotels, catering companies, or bartending shows.

With our sufficient production volume and storage capacity, we can provide you with any amount of ice.
